

EMMA ID: 05573

Gene: *Pparg*

Common name: *Ppr6-IHB / 129(B6)-PpargP465L*

Allele: *Pparg*^{tm1Avp}

Genotyping Information

Genotyping by end-point PCR based on gel is composed of a genespecific short range PCR using primers on wild type allele and a mutant allele-specific short range PCR. The combined results show the genotype of the mice. For example: mutant positive, wild type positive = Heterozygous.

Homozygous mutants are lethal for this mouseline.
